Introduction of Excel

Q1. What is Microsoft Excel?

Microsoft Excel is powerful spreadsheet software used for organizing, analyzing, calculating and visualizing data through rows and columns.

Q2. What is workbook in Excel?

An Excel workbook is a single file that acts as a container for one or more worksheets, allowing you to organize store and manage multiple related sets of data.

Q3. What is a worksheet?

A worksheet in excel is a single grid-based page made up of rows and columns where you enter organize and perform calculations on data.

Q4. What are rows in excel?

Rows are horizontal lines of ~~all~~ cells identified by numbers on the left side of a worksheet and single excel worksheet contains exactly 1,048,576 rows.

Q5. What are columns in excel?

Columns are vertical lines of cells identified by letters (A, B, C, etc.) at the top of the worksheet and a single worksheet contains 16,384 columns.

Q6. What is a cell?

A cell is the fundamental intersection of a row and a columns in a excel worksheet where you enter and store your data.

Q7. What is the cell address?

A cell address is the unique identifier of a cell in excel formed by combining its column letter and row number (e.g. A1).

Q8. What is a Formula in Excel?

In excel a formula is an expression that performs calculations on values in a worksheet. Every formula must begin with an equal sign (=), and they typically use cell addresses ~~s~~ like (A1 + B1) so that results update automatically whenever the underlying data changes.

Q9. What are Functions in excel?

In excel, functions are pre-defined formulas that perform specific calculations or ~~tasks~~ tasks, such as summing values or counting items, using ~~arguments~~ provided arguments.

Example —

- Without functions :— = A1 + A2 + A3
- with functions :— = SUM (A1 : A3)

= FUNCTION_NAME(arguments)

Q10. What is a range in excel?

A range in excel is a group of two or more cells selected together, typically identified by the addresses of the top - left and bottom - right cells (e.g., A1 : C5).

1. TAB : (A TAB is a category on the excel ribbon that organizes related tools (e.g., Home, Insert).)

Excel-এর উপরের menu bar-এ যেগুলো থাকে:

- Home
- Insert
- Data

এগুলোকেই TAB বলে।

Note :— Different types of কাজ আলাদা আলাদা TAB-এ থাকে।

---

2. Ribbon : (The ribbon is the top menu area in excel that contains ~~tools~~ tabs, groups and command.)

Tab-এর নিচে যে বড় area-টা থাকে যেখানে সব tools থাকে সেটাই Ribbon.

Note :— পুরো tools area = Ribbon.

---

3. Group : (A group is a section within a tab that contains ~~rutated~~ related commands (e.g, Font, Alignment).)

প্রতিটা tab এর ভিতরে ছোট ছোট section থাকে যেগুলো Seperator দিয়ে seperate করা থাকে, এইগুলোকে Group বলে, Example :—

- clipboard.
- Font
- Alignment

~~4. Command : Button বা option যা কাজ করে।~~

---

4. Command : (A command is a tool or button used to perform a specific action.)

Button বা option যা কাজ করে, যেমন — Copy, Paste, Bold, etc.

Full structure :—

Flow টা এমন হয় —

~~Tab → Ribbon (Command → Group)~~

Tab → Ribbon (Group → Command)

Example —

Home Tab এর ভিতরে :

- Font Group :
  - Bold
  - Italic
  - Font size

❖ এখন —

Home = Tab
Font = Group
Bold = Command / button

→ Font & Bold (Group with Command) = Ribbon

Note :— Tab = Category
Group = Section
Command = Button
Ribbon = Full Area

---

5. Quick Acess Toolbar :— (A customizable toolbar for frequently used commands.)

Top left-এ থাকে (save, undo, redo)

---

6. Dialog Box launcher : (A small arrow in a group that opens more advanced option in a dialog box.)

Excel-এর Ribbon এ কিছু group-এর নিচে ছোট arrow (↘) থাকে, ওটা click করলে extra বা advance settings open হয়।

Example:

Font Group → arrow click (↘) → full font settings (size, color, effects)

7. Contextual tabs: (Tabs that appears only when a specific object is selected, showing related tools.)

Normally সব tab সবসময় থাকে না, কিন্তু tab specific কাজ করলে automatically আসে।

Example —

Chart select করলে → Chart Design, Format tab আসে।
table select করলে → Table Design tab আসে।

8. Mini Toolbar: Right click করলে ছোট toolbar আসে Quick formatting এর জন্য।

9. Status Bar: নিচে থাকে (bottom-এ), sum, average, count quick দেখায়।

10. Name Box: Formula bar এর বামে current cell address দেখায় (A1, B2)

11. Formula Bar: এখানে formula দেখা বা ~~ও~~ edit করা হয়।

12. Types of cell reference: Relative (A1), Absolute (A1), Mixed ($A1 or A$1).

13. Common Functions: SUM(), AVERAGE(), COUNT(), MAX(), MIN().
